Peer-reviewer statements	Peer-Review: <input checked="" type="checkbox"/> Anonymous <input type="checkbox"/> Onymous Conflicts-of-Interest: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

SPECIFIC COMMENTS TO AUTHORS

1. The title does not reflect the topic appropriately, it says 'three outcomes of one disease', the discussion, however, revolves more around the difficulties in diagnosing the condition on endoscopic examination. 2. Primary gastric amyloidosis is a known entity.

SPECIFIC COMMENTS TO AUTHORS

In this manuscript, the authors aimed to report three cases of localized gastric amyloidosis mimicking gastric mucosa-associated lymphoid tissue (MALT) lymphoma. They concluded that early detection, diagnosis and treatment of this rare disease resulted with good prognosis. Since localized gastric amyloidosis is a very rare metabolic disease, the cases are interesting and the manuscript has been considered as well-written.

SPECIFIC COMMENTS TO AUTHORS

the authors performed a case series study about 3 cases presentation with primary gastric amyloidosis with different outcomes. the manuscript needs good English editing by native English speaker. 1- the title has to identify it is a case series study. 2- comments of previous revision is seen in the manuscript. that is not professional. please delete it. 3- references are written in a bad way. reconsider rewrite it in a uniform style.
