

## Appendix

### Patient satisfaction survey items regarding rapid protocol and rapid, home-based versus infusion-centre based infliximab infusions:

1. How **satisfied** are you with the rapid infliximab infusion therapy you receive at home?
2. How much **inconvenience** do you believe that the infliximab infusion therapy has on your overall quality of life?
3. How much **impact** do you believe that the infliximab infusion therapy has on your work and/or school life?
4. How much **impact** do you believe that the infusion therapy has on your social life (i.e. relationships with family and/or friends)?
5. How much **impact** do you believe that the infliximab infusion therapy has on your sexual life?
6. If you have had side effects from infliximab infusions, how much **impact** do you believe the side effects have had on your quality of life?
7. How much do you **prefer** the rapid (30 minute) infliximab infusion over the standard 1 hour infusions?
8. How much do you **prefer** rapid infusions at home as compared to at an infusion centre?
9. How much do you **prefer** rapid infusions at home as compared to hospital at home clinic?
10. Do rapid infusions at home have less **inconvenience** as compared to infusion at infusion centre?
