## Certificate of Biostatistics

Dear Editor,

I can confirm that all statistical methods and analysis performed in the current manuscript are appropriate for the study. I serve as external biostatistics expert for Agency for Medicinal Products and Medical Devices of Croatia. Furthermore, I am a member of Institutional Review Board of Split-Dalmatia Health Centre where I am responsible for statistical review of submitted proposals. Therefore, I believe that additional biostatistics review is not necessary.

Manuscript prepared for WJG: "Inactive Matrix Gla protein plasma levels are elevated in patients with inflammatory bowel disease"

Kind regards,

  
Assoc. Prof. Josko Bozic, MD, PhD  
(josko.bozic@mefst.hr)
