Review of possible psychological impacts of COVID-19 on frontline medical staff and reduction strategies

Fu XW *et al.* Possible psychological impacts of COVID-19

Xiao-Wei Fu, Li-Na Wu, Ling Shan

Abstract

Like soldiers, frontline medical staff provide a first line of defense and have played a critical role in their responses to the outbreak of coronavirus disease-2019 in December 2019. It is important to acknowledge the considerable pressure placed on frontline medical staff in the face of a new type of coronavirus that is highly infectious and for which no specific
