SMARCB1-deficient Tumors of Childhood: A Practical Guide ...

<https://journals.sagepub.com/doi/full/10.1177/1093526617749671>

Dec 27, 2017 · The SMARCB1 gene (INI1, BAF47) is a member of the SWItch/Sucrose Non-Fermentable (SWI/SNF) chromatin remodeling complex, involved in the epigenetic regulation of gene transcription. SMARCB1 acts as a tumor suppressor gene, and loss of function of both alleles gives rise to SMARCB1-deficient tumors. The prototypical SMARCB1-deficient tumor is the malignant **rhabdoid** ...

Jun 30, 2020 · The SMARCB1/INI1 gene was first discovered in the mid-1990's, and since then it has been revealed that loss of function mutations in this gene result in aggressive rhabdoid tumors. Recently, the term "rhabdoid tumor" has become synonymous with decreased SMARCB1/INI1 expression. When genetic aberrations in the SMARCB1/INI1 gene occur, the result can cause ...
