The authors presented a rare clinical entity, a pregnant woman with acute amnesia and headache. Brain magnetic resonance imaging and angiography confirmed the patient suffered an acute infarction in the bilateral anterior fornix. Authors should make Neuropsychological assessment when quantify the degree of amnesiaa, such as MoCA, MMSE, WCST, WMS-R,et al. The authors also should present a figure that show the relationship between the Fornix and the Papez circuit and the ACA blood supply pattern of the Fornix.
