**Manuscript NO:** 57484

**Manuscript Type:** CASE REPORT

**Acute amnesia during pregnancy due to bilateral fornix infarction: A case report**

**Authors:** Min Jai Cho, Dong-Ick Shin, Moon-Ku Han, Kyu Sun Yum

**Reply to reviewers:**

**1. The authors presented a rare clinical entity , a pregnant woman with acute amnesia and headache. Brain magnetic resonance imaging and angiography confirmed the patient suffered an acute infarction in the bilateral anterior fornix. Authors should make Neuropsychological assessment when quantify the degree of amnesiaa , such as MoCA, MMSE, WCST, WMS-R,et al. The authors also should present a figure that show the relationship between the Fornix and the Papez circuit and the ACA blood supply pattern of the Fornix.**

- Thank you for kind review and advice of my manuscript. According to your recommendation, I have written result of exam of the MMSE and MoCA. I also I have made a figure of vascular supply of fornix and add in the manuscript. Thank you.
