SPECIFIC COMMENTS TO AUTHORS

I agree with the author's view of making full use of network and establishing good doctor-patient communication in the battle against COVID-19 in the manuscript. I suggest modifying the title of the manuscript because the author mainly discussed adjunct management strategies in out-patient with COVID-19 complicated with gastric cancer, for example, nutritional status and mental health instead of surgical treatment strategies.

SPECIFIC COMMENTS TO AUTHORS

It is valuable that the author discussed disease progression, characteristics and treatment strategies in COVID-19 patients with specific stages of gastric cancer. It reviewed most of important studies on this topic and the author should add several influential references, especially government recommendations.
