**Manuscript Type:** ORIGINAL ARTICLE

### Basic Study

Use of alkaline phosphatase to prealbumin ratio as <sup>4</sup>an independent predictive factor for the prognosis of gastric cancer

Li Y *et al.* APR for the prognosis of GC

Yang Li, Jin-Shen Wang, Yun Guo, Tao Zhang, Le-Ping Li

### Abstract

#### BACKGROUND

Gastric cancer (GC) is characterized by a low 5-year survival rate. The prognosis is still not satisfactory though it has been significantly improved according to the medical development. Thus, more efficient indexes for the evaluation of GC prognosis need to

## Alkaline Phosphatase-To-Albumin Ratio as a Prognostic ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5665053>

Preoperative alkaline phosphatase-to-albumin ratio (APAR), an original inflammation-based score, has been established to analyze the prognostic significance in PDAC. Therefore, in this study, we **aim to formulate a valuable prognostic nomogram for PDAC following curative resection.**

**Cited by:** 17

**Publish Year:** 2017

## Prognostic impact of the pretreatment albumin to alkaline ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6549394>

Introduction: Albumin and **alkaline phosphatase** have been previously demonstrated as **independent** prognostic factors for various types of **cancer**. Here, we aimed to explore the potential value of pretreatment albumin to **alkaline phosphatase ratio** (AAPR) on overall survival (OS) in nonmetastatic breast **cancer** patients.

## The Value of Alkaline Phosphatase-to-Albumin Ratio in ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7026734>

Alkaline phosphatase-to-albumin ratio, as a novel and convenient **index derived from routine liver function test**, has been discovered to be independently related to prognosis in many malignancies following various anticancer therapies in recent reports [14–16, 19].

**Cited by:** 3

**Author:** Wentao Zhou, Yuan Fang, Xu Han, Tiant...

## Predictive value of pretreatment albumin-to-alkaline ...

<https://www.onlinelibrary.wiley.com/doi/10.1002/cam4.3244>

Using a retrospective cohort study with a large number of patients, this study investigates the relationships between albumin-to-**alkaline phosphatase ratio** as a prognostic **factor** ...

### Alkaline Phosphatase-To-Albumin Ratio as a Prognostic ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5665053>

Background: The prognosis of pancreatic ductal adenocarcinoma (PDAC) remains poor and the models for survival prediction in PDAC patients after curative resection are still limited. Preoperative alkaline phosphatase-to-albumin ratio (APAR), an **original inflammation-based score**, has been established to **analyze the prognostic significance in PDAC**.

### The Prognostic Value of Albumin-to-Alkaline Phosphatase ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6790835>

Also, the role of ratio between albumin (ALB) and alkaline phosphatase (ALP) as a prognostic factor has been **reported in patients with pancreatic ductal adenocarcinoma and advanced hepatocellular carcinoma [19,20]**. However, to the best of our knowledge, the AAPR has not been studied in non-metastatic NPC patients.

### Albumin-to-alkaline phosphatase ratio serves ... - BMC Cancer

<https://bmccancer.biomedcentral.com/articles/10.1186/s12885-020-07023-9> ▾

Jun 09, 2020 · Recent evidence suggests that albumin-to-Alkaline Phosphatase Ratio (AAPR) functions as a **novel prognostic marker in several malignancies**. However, whether it can predict the **prognosis of unresectable pancreatic ductal adenocarcinoma (PDAC) remains unclear**.

<https://www.researchgate.net/publication/343184878...>

Albumin-to-Alkaline Phosphatase Ratio is an Independent Prognostic Indicator in Combined Hepatocellular and Cholangiocarcinoma June 2020 Journal of Cancer 11(17):5177-5186

### The predictive value of alkaline phosphatase and lactate ...

<https://link.springer.com/10.1007/s13277-015-3851-y> ▾

The elevation of **alkaline phosphatase (ALP)** and lactate dehydrogenase (LDH) has been demonstrated to predict worse **prognosis** in various malignancies; however, their prognostic value in esophageal squamous cell carcinoma has not been well studied. We conducted a retrospective study of 906 patients with esophageal squamous cell carcinoma to explore their prognostic value for overall survival.

### Prognostic significance of serum alkaline phosphatase and ...

<https://link.springer.com/article/10.1007/s10120-018-0897-8> ▾

Nov 11, 2018 · **High level of ALP** is an independent, worse prognosis factor for **patients receiving chemotherapy for unresectable and recurrent gastric cancer**. This study evaluated the prognostic value of alkaline phosphatase (ALP) and lactate dehydrogenase (LDH) together with host-related factors in ...
