Apr 30, 2020 · Even during the COVID-19 pandemic, NOM (ie nil by mouth, nasogastric decompression) should always be the first approach in patients with adhesive small bowel obstruction (ASBO) unless there are signs of peritonitis, strangulation or bowel ischaemia. NOM is effective in approximately 70–90% of patients with ASBO.

Retrospective Study

Managing acute appendicitis during the COVID-19 pandemic in Jiaying, China

Yuan Zhou, Lu-Sha Cen

Abstract

BACKGROUND

COVID-19 has been leading to a worldwide pandemic and had a profound impact on our routine surgical activities. Acute appendicitis is the most common abdominal emergency worldwide. Therefore, it is highly essential to assess the pandemic influence
