#### **SPECIFIC COMMENTS TO AUTHORS**

Dear authors, I reviewed the review manuscript, "Hepatocellular Carcinoma LI-RADS Treatment Response Assessment: Lessons Learned and Future Directions". In clinical practice, evaluation of treatment response for various treatment modalities is especially important issue. LIRADS Treatment Response Assessment can provide a possibility as a new framework to describe treatment response because of limitations to the method currently used for response evaluation including mRECIST criteria. I think authors reviewed and summarized this topic concisely and clearly and will help readers understand this topic interestingly.
