### Resection of an esophageal schwannoma with thoracoscopic ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5099309>

The incidence of **benign** primary tumors of the **esophagus** is low. The most common histological type is leiomyoma; the incidence of schwannoma among **benign** tumors is low [1–5]. Esophageal schwannomas are difficult to definitively diagnose by biopsy because they are located in ...

### Resection of an esophageal schwannoma with thoracoscopic ...

<https://surgicalcasereports.springeropen.com/articles/10.1186/s40792-016-0256-0> ▾

Nov 07, 2016 - Esophageal schwannomas are rare primary submucosal **esophageal** tumors. We herein report a case of an **esophageal schwannoma** that was difficult to diagnose. A 39-year-old woman presented with chief complaints of difficulty swallowing and epigastric pain. Enhanced computed tomography of her chest revealed a tumor mass at the upper thoracic **esophagus** with internal ...

## [Benign esophageal schwannoma: A case report and review ...](#)

[www.njcponline.com/article.asp?issn=1119-3077;year=...](http://www.njcponline.com/article.asp?issn=1119-3077;year=...)

The incidence of **benign** primary tumors of the **esophagus** is low and accounting for ~2% of all **esophageal** tumors. More than 80% of **benign esophageal** tumors are leiomyomas and schwannomas and are extremely rare. We **report** a **case** of a 55-year-old woman with **benign esophageal** schwannoma successfully treated with subtotal esophagectomy.

## [Resection of an esophageal schwannoma with thoracoscopic ...](#)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5099309>

The most common **benign** submucosal **esophageal** tumor is leiomyoma. According to previous reports, leiomyoma accounts for more than half of all **benign esophageal** tumors [1, 2]. **Benign** submucosal **esophageal** tumors also include lipomas, granular cell tumors, and schwannomas. A GIST is an **esophageal** submucosal tumor with malignant potential.

### [A report of three cases of surgical removal of esophageal ...](#)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4842818>

**Benign** primary tumors of the **esophagus** are uncommon; most cases of **benign esophageal** tumors include leiomyomas and cases of **esophageal** schwannomas are extremely rare. We **report three** cases that were diagnosed with a leiomyoma pre-operatively, but all the tumors were identified as a **schwannoma** on post-operative pathology ( Table 1 ).

### [Resection of an esophageal schwannoma with thoracoscopic ...](#)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5099309>

The authors stated that even if the max SUV is >6.0, a **benign schwannoma** cannot be excluded. Our **case** does not conflict with their **report** in that our **benign schwannoma** showed a max SUV of 5.5 and MIB-1 labeling index of 10 %. Therefore, FDG-PET could not reveal whether the hypermetabolic appearance indicated a **benign** or malignant tumor.
