

Dear Editor

Greetings!

Thank for accepting our article for minor revision, we have included all the suggestions given by the reviewer. Please let us know if anything is regarding the same.

Thank you very much

Dr.Durairaj Sekar

It is interesting to identify a new miR-802-5p and discuss its involvement in Type-2 Diabetes Mellitus, worth to find more because much need to know about T2DM. however, no need to say so much about T2DM in the second paragraph of the introduction. maybe one or two sentences is ok before the first paragraph. then the importance of the miRNA in diabetes and further information about miRNA.

Answer: Thanks for the comments and suggestions, we made the corrections in the manuscript according to the reviewer's suggestions.
