#### **SPECIFIC COMMENTS TO AUTHORS**

The authors described treatment of encrusted cystitis using HA and BoNT/A. It is quite interesting and valuable data regarding to treatment of encrusted cystitis. However, there are a few concerned points. 1 The authors also try to review of literature regarding to successful treatment of encrusted cystitis, but there is no data about it. 2 It is easy to understand about efficacy of HA, on the other hand it is difficult about BoNT/A. It seems to improve after fourth therapy without BoNT/A. It has been improving previous three therapies, why was BoNT/A added? 3 The authors described medical effects of BoNT/A, but the authors didn't describe the mechanism why BoNT/A is effect on encrusted cystitis. 4 How to inject and how dose is BoNT/A used?
