Successful pregnancy after protective hemodialysis for chronic kidney disease: a case report

Wang ML *et al.* Successful pregnancy after hemodialysis for CKD

Meng-Lu Wang, Ying-Dong He, Hui-Xia Yang, Qian Chen

Abstract

BACKGROUND

Chronic kidney disease (CKD) affects almost 3% of females of child-bearing age, who have a high risk of adverse maternal and fetal outcomes. Additionally, high renal burden as a result of pregnancy may lead to deterioration of renal function. An increasing number of women with CKD stage 3 to 5 have a strong desire to conceive, and both
