SPECIFIC COMMENTS TO AUTHORS

This is a very interesting case report with regard to a rare case of plastic bronchitis associated with botrytis cinerea infection in children. Nevertheless, minor revisions could improved article's quality. 1. In the Introduction section, a couple of sentences describing botrytis cinerea's molecular identity as well as infectious potential should be included. 2. The aim of the study should be more clear. 3. Newly published manuscripts should be included in the References section and discussed in the Discussion section. 4. Figures' quality is acceptable. 5. Grammatical errors should be corrected throughout the Text.

SPECIFIC COMMENTS TO AUTHORS

As the authors took into consideration the majority of the reviewer's suggestions the article might be accepted for publication in its current form. Nevertheless, a few grammatical errors still need correction throughout the Text.
