Observational Study

Safety of gastrointestinal endoscopy in patients with acute coronary syndrome and concomitant gastrointestinal bleeding

Elkafrawy AA *et al.* GIE in ACS with GIB

Ahmed A Elkafrawy, Mohamed Ahmed, Mohammad Alomari, Ahmed Elkaryoni, Kevin F Kennedy, Wendell K Clarkston, Donald R Campbell

Abstract

BACKGROUND

Gastrointestinal bleeding (GIB) is a major concern in patients hospitalized with acute coronary syndrome (ACS) due to the common use of both antiplatelet medications and

Safety of Endoscopy for Hospitalized Patients With Acute ...

<https://www.ncbi.nlm.nih.gov/pubmed/32022723>

RESULTS: A total of 1,281,749 **patients** were admitted for **acute coronary syndrome** in 2016, and 55,035 of these **patients** underwent **endoscopy**. In the multivariable regression analysis, those who underwent a **GI** procedure (odds ratio [OR] 0.80, P value < 0.002) and angiogram (OR 0.48, P value < 0.001) had lower in-hospital mortality, after adjusting ...

Sep 29, 2009 · Objectives We assessed the incidence, predictors, and outcomes of **gastrointestinal bleeding (GIB)** in **patients with acute coronary syndromes (ACS)**. Background GIB is a potential **hemorrhagic complication** in **patients** with **ACS** treated with antithrombotic and/or antiplatelet medications.

Mar 10, 2016 · When the indication for **endoscopy** is **acute GI bleeding**, those **patients with coronary artery disease (CAD)** are at increased risk for both silent ischemia and arrhythmias. The **adrenergic** response to **endoscopy** is felt to act as a "stress test," provoking ischemia in a supply-demand fashion.
