SPECIFIC COMMENTS TO AUTHORS

The title is informative and relevant. The references are relevant and recent. The cited sources are referenced correctly. Appropriate and key studies are included. The introduction reveals what is already known about this topic. The data are discussed from different angles and placed into context without being overinterpreted. The conclusions answer the aim of the study. The conclusions are supported by references and own results. This study added to what is already in the topic. The article is consistent within itself. Specific comments on weaknesses of the article and what could be improved: The role of stem cell therapy for the improvement of barrier function

SPECIFIC COMMENTS TO AUTHORS

The authors aim to review for intestinal barrier on gastrointestinal disease. The review is professionally written. However, the reviewed diseases are restricted to IBD, IBS, and immune checkpoint inhibitor colitis. The unhandled many diseases such as intestinal infection, NSAIDs induced enteropathy, coeliac disease, etc. produce injury to intestinal barrier. The title should be changed to clear the contents of the review.
