Dear Dr. Ma

Re: Manuscript ID: 58532 and Title: **Subchondral bone as a novel target for regenerative therapy of osteochondritis dissecans: C-arm X-ray-guided minimal implantation technique using peripheral blood stem cells: A case report**

Thank you for your letter and for the reviewers' comments concerning our manuscript entitled "**Subchondral bone as a novel target for regenerative therapy of osteochondritis dissecans: C-arm X-ray-guided minimal implantation technique using peripheral blood stem cells: A case report**". Those comments are very helpful for us to revise and improve our manuscript. We have carefully addressed reviewers' comments and have made corrections. The responses to the reviewer's comments are listed below.

Best regards!

Sincerely yours,

Pei-Jian Tong, MD
MD, Professor, Chief
Department of Orthopedics
The First Affiliated Hospital of Zhejiang Chinese Medical University

Reviewer #1:

- 1) The case report is interesting, the manuscript is well-written and it can be accepted for publication.

Response: We would like to extend our appreciation to you for carefully reviewing our paper. We are glad that you suggest our paper to be accepted for publication in **World Journal of Clinical Cases**.

Science editor:

- 1) The authors did not provide original pictures. Please provide the original figure documents. Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor.

Response: We have uploaded the original pictures using PowerPoint and all graphs or arrows or text portions can be reprocessed by the editor.

- 2) Please provide the informed consent of treatment.

Response: We have uploaded the informed consent of treatment.

Company editor-in-chief:

- 1) The title of the manuscript is too long and must be shortened to meet the requirement of the journal (Title: The title should be no more than 18 words).

Response: We have shortened the title as "Subchondral bone as a novel target for regenerative therapy of osteochondritis dissecans: A case report".
