#### **SPECIFIC COMMENTS TO AUTHORS**

General comments: The manuscript-review entitled “Holistic care model of time-sharing management for severe and critical COVID-19 patients” describes a holistic care model on time-sharing management for severe and critical cases from the authors daily work experiences. At present, epidemic prevention and control in China has been on the verge of victory, while some other countries are experiencing the dark moments that they have experienced once. This article provides important evidence for non-ICU nurses to adapt care management mode of ICU and ensure the quality and efficiency of care during the epidemic. I enjoyed the paper, and found it quite informative. It will have a good impact as it is very timely. Of course the literature will also be rapidly changing in this field as more about COVID 19 is understood. Something to consider that may enhance the paper is a summary table of the key points. This will immediately catch a readers attention.
