## Abstract

### BACKGROUND

Papillary thyroid cancer (PTC) has good prognosis so that the local recurrence or distant metastasis can occur later on the lifetime follow up. In this study, we report recurrence of PTC in subcutaneous area combined with lymph node metastasis. A

### [Needle Tract Implantation Following Fine-Needle Aspiration ...](https://link.springer.com/article/10.1007/s00268-019-05161-1)

<https://link.springer.com/article/10.1007/s00268-019-05161-1> ▾

Sep 12, 2019 · The recurrence in the neck of thyroid cancer may occur as **lymph node metastasis, growth of residual tumor following incomplete resection, spillage of cancer cells during surgery**, or needle tract implantation. The spatial locations of the present cases were not consistent with nodal metastasis or growth of residual tumors.

Author: Toshitetsu Hayashi, Mitsuyoshi Hirok...      Publish Year: 2020
