**Manuscript Type:** CASE REPORT

**Dysphagia in a patient with ankylosing spondylitis: A case report**

Wang XW *et al.* A case of Dysphagia with AS.

## Abstract

### BACKGROUND

Ankylosing spondylitis (AS) is a systematic and rheumatic disease, which causes multiple symptoms. However, dysphagia due to the formation of a giant anterior cervical osteophyte is rare in patients with ankylosing spondylitis.

### CASE SUMMARY

We present a case of a 65-year-old male patient who was diagnosed with ankylosing spondylitis and visited the hospital with a complaint of progressive dysphagia. The

## Extremely Late Recovery of Unusual Cervical Ankylosing ...

<https://www.sciencedirect.com/science/article/pii/S1878875020307385>

Jul 01, 2020 · **Ankylosing spondylitis** (AS) is an **inflammatory** disease that involves above all the spine and the pelvis. In the spine, the **inflammatory** processes cause the formation of syndesmophytes between the vertebral bodies and the ossification of ligaments, with bony overgrowth. In this setting, **dysphagia** is a rare but severe complication and only a few **cases** have been **reported** in the literature.
