SPECIFIC COMMENTS TO AUTHORS

This is an interesting case of mesenteric ligamentous fibromatosis that was misdiagnosed as stromal tumor before surgery. This case is rare, and the manuscript is very well written. The discussion is too long, please short it. And some minor language polishing should be corrected.

SPECIFIC COMMENTS TO AUTHORS

Interesting case report. The case presentation section should be revised according to the journal's guideline. And a minor editing is required. Thank you. No other specific comments.
