High Incidence of Thromboembolic Events in Patients ... 翻译此页

<https://ascopubs.org/doi/full/10.1200/JCO.2011.35.5669>

2018-12-18 · Purpose This study was designed to determine the incidence of venous and arterial thromboembolic events (TEEs) in patients treated with cisplatin-based chemotherapy and to analyze the prognostic value of patients' baseline and treatment characteristics in predicting TEE occurrence. Patients and Methods We performed a large retrospective analysis of all patients treated with cisplatin-based ...

High Incidence of Thromboembolic Events in Patients ...

<https://ascopubs.org/doi/full/10.1200/JCO.2011.35.5669>

Among chemotherapeutic agents, cisplatin-based regimens particularly have been associated with a wide range of thromboembolic complications. 16–25 In one retrospective study of patients with urothelial cancer, 35 (12.9%) of 271 patients receiving multiagent cisplatin-based chemotherapy experienced a TEE, with three events directly resulting in death. 26 Another retrospective study of patients with germ cell cancer receiving cisplatin-based chemotherapy ...
