Dear Dr. Ma,

Thank you very much for reviewing our manuscript “Amelioration of cognitive impairment following growth hormone replacement therapy: a case report”. We also greatly appreciate the reviewers for their complimentary comments and suggestions. Our responses are given in a point-by-point manner below:

**Reviewer #1**

*This is an excellent case report regarding growth hormone deficiency after intracranial hemorrhage, and its replacement therapy focused on the amelioration of cognitive status. It is indeed still a controversial issue, however the authors comprehensively and meticulously present their case, supported by solid proofs and reasonably discuss the issue. All part of the manuscript, (introduction, case presentation and discussion) are well-written and according to the Journal's requirements.*

Response: Thank you very much for your comments.
