

## ANSWERING REVIEWERS

January 3rd, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 5890-review.doc).

**Title:** The association between orofacial granulomatosis and Crohn's disease in children: systematic review

**Author:** Marzia Lazzerini, Matteo Bramuzzo, Alessandro Ventura

**Name of Journal:** *World Journal of Gastroenterology*

**ESPS Manuscript NO:** 5890

The manuscript has been improved according to the suggestions:

(1) In the short title we change "Crohn" in "Crohn's disease" as suggested.

(2) *Page 4: I don't feel that azathioprine, thalidomide and infliximab should be grouped as "immunosuppressive" drugs.*

As thalidomide was incorrectly include in the term "immunosuppressive", we use the terms "immunosuppressive or immunomodulatory drug" to include both azathioprine and infliximab and thalidomide.

(3) *Page 5 - Last line. Why not Crohn's disease itself rather than as subtype?*

We added in the sentence the word "manifestation" to include the possibility that OFG could be a direct expression of Crohn's disease.

4) *Language*

The manuscript has been kindly edited by Genevieve Becker, native English speaker. We have acknowledged her contribution at the end of the manuscript. Genevieve Becker is a native English speaker who is a published author and technical editor and we are confident that the paper is now of a high standard for publication. If the editor notice any particular words or phrase that require correction we will be happy to correct it.

Thank you again for the interest reserved to our manuscript.

Sincerely yours,

Marzia Lazzerini PhD
