Concomitant chemo-radiotherapy for unresectable ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3863264>

When oesophageal cancer presents with unresectable disease, the general consensus is to treat it using a combined approach with chemotherapy and radiotherapy since the benefit of definitive chemo-radiation over radiation alone has been well documented.⁹The recommendation from literature studies, based on small but randomized experience, is to treat both squamous and adenocarcinoma cell histology ...

Chemoradiotherapy for esophageal squamous cell cancer

<https://pubmed.ncbi.nlm.nih.gov/27380810>

Therefore, chemoradiotherapy is recognized as the standard non-invasive treatment for patients with localized esophageal cancer who opt for non-surgical treatment. JCOG9906 showed promising outcomes for stage II/III ESCC patients. But there are some problems about chemoradiotherapy for esophageal squamous cell carcinoma.

<https://pubmed.ncbi.nlm.nih.gov/31529018>

Importance: Effective treatment options for locally advanced esophageal cancer are limited, and rates of local recurrence after standard chemoradiotherapy remain high. Objective: To evaluate toxic effects, local control, and overall survival rates after chemoradiotherapy with a simultaneous integrated boost of radiotherapy dose to the gross tumor and nodal disease for patients with ...

[A case of advanced esophageal cancer with liver ...

<https://www.ncbi.nlm.nih.gov/pubmed/18701852>

In this report, we present a case of unresectable advanced esophageal SCC with multiple liver metastases which showed remarkable regression by DCF therapy, with relatively slight adverse effects. The patient was a 46-year-old female, who underwent upper gastrointestinal fiber-optic endoscopy for dysphasia and was diagnosed to have upper middle ...

Definitive Chemoradiotherapy and Salvage Esophagectomy ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4253938>

The prognosis of esophageal cancer has improved in recent years, but remains poor despite curative resection. 1 The prognosis is extremely dismal in patients with distant metastasis. The Radiation Therapy Oncology Group (RTOG) trial 85-01 showed that chemoradiotherapy (CRT) improved
