SPECIFIC COMMENTS TO AUTHORS

This study aimed to estimate the incidence of cardiovascular irAEs among patients undergoing ICI therapy for various malignancies. The study is well design, and the paper is well written. I only have some minor comments: 1. Page 9, data for the heterogeneous of incident of artial fibrillation ($I^2=0\%$, $P=0.6$) is not correct. Please check fig 7 and rewrite the results. 2. Please explain what the panel A and panel B in figure 7 stand for? 3. The Incidence of atrial fibrillation is significant higher than other cardiac complicantions. The mechanisms for the increased risk of atrial fibrillation should be discussed. 4. It is also important to explore what are the risk factors for atrial fibrillation in these patients (e.g age, sex, different kinds of ICI therapy)
