Dear Authors! This manuscript reviews the key principles, indications, contraindications, outcomes and future developments of single stage revision arthroplasty for hip and knee periprosthetic joint infections. Based upon comprehensive and reliable analysis of current literature, this manuscript addresses the criteria for single stage revision arthroplasty while proposing future directions of research and clinical application.

1 Title. The title reflects the main subject of the manuscript, but doesn't identify the report as a systematic review.

2 Abstract. The abstract summarizes the work described in the manuscript adequately, but doesn't provide a structure.

3 Key words. The key words reflect the focus of the manuscript, but the different keywords are very similar. prosthetic joint infection, single stage revision, single stage exchange arthroplasty, revision total joint arthroplasty, one stage revision for chronic prosthetic infection, and revision joint replacement

4 Background. The manuscript adequately describes the background, present status and significance of the study.

5 Methods. This manuscript reviews single stage revision arthroplasty for prosthetic joint infection and encompass the history, clinical reasoning, principles, indications, contraindications, clinical outcomes, and technical pearls surrounding single stage revision for prosthetic joint infection.

6 Results. The results are based upon comprehensive and reliable analysis of current literature. The criteria for single stage revision arthroplasty is addressed, while proposing future directions of research and clinical application.

7 Discussion. Summarizes the main findings in the recent literature, regarding indications and contraindications in single stage revision arthroplasty for hip and knee periprosthetic joint infections. The findings of this review, their relevance to the literature, the limitations and the conclusion is stated in a clear and definite manner. This review is of scientific significance and/or relevance to clinical practice.

8 Illustrations and tables. The tables are sufficient and of adequate quality. Table 1 could be improved. The figure illustrates the paper content in a good way.

9 References. The manuscript cites appropriately the latest and
