Answer to reviewers

Name of journal: World Journal of Radiology

Manuscript Type: REVIEW

**Title: MULTIMODALITY IMAGING IN COVID-19 PATIENTS: A KEY
ROLE FROM DIAGNOSIS TO PROGNOSIS.**

Authors: Antonello D'Andrea; Juri Radmilovic; Andreina Carbone; Alberto Forni;
Ercole Tagliamonte; Lucia Riegler; Biagio Liccardo; Fabio Crescibene; Cesare
Sirignano; Giovanna Esposito; Eduardo Bossone

Dear reviewers I responded to your requests:

1. I provided decomposable figure of all figures, whose parts are movable and editable. Text of figures is reported in text boxes. Figures are arranged using PowerPoint file to ensure that all graphs and text portions can be reprocessed. It has not been possible to avoid red and green colour, even though these colours are present only in one figure.
2. I checked the comments in the peer-review report and I responded to the question posed, creating this answering review document. I attended to the

- single question posed in the previous review request: I used the term lung ultrasound (LU) along the manuscript; I added in the text the proposed reading suggested; I provided the conflict of interest disclosure form and the copyright license agreement. Now I provide the authors contribution and the original figures document arranged in a PowerPoint file. In the previous review file, I provided a decomposable table file and the Pubmed number and DOI citation numbers to all the references. I resolved all language issues in the manuscript.
3. I provided the author contribution file, indicating the their specific role to this publishing work.

Correspondence to: Antonello D'Andrea MD, PhD

Best regards

Antonello D'Andrea
