SPECIFIC COMMENTS TO AUTHORS

Dear Editor, Thank you for the opportunity to revise this manuscript. I read with pleasure the review by Antonello D'Andrea et al. with the title: "MULTIMODALITY IMAGING IN COVID-19 PATIENTS: A KEY ROLE. FROM DIAGNOSIS TO PROGNOSIS". I found this review to be a nice manuscript, easy to understand, and very well-written and referenced; furthermore, the topic is interesting and important. The paper is a quite comprehensive reading of the latest published about imaging modalities in COVID-19 patients. I have just a comment to the authors if they agree. Please use the term lung ultrasound (LU) along with the manuscript. Proposed reading (NB: you are not obligated to read it). 1) Our Italian experience using lung ultrasound for identification, grading and serial follow-up of severity of lung involvement for management of patients with COVID-19. *Echocardiography*. 2020 Apr;37(4):625-627. doi: 10.1111/echo.14664. Epub 2020 Apr 15. 2) To many "fake new" publishing early data are available about modalities image and/or the efficacy of different drugs please see "Infodemic and the spread of fake news in the COVID-19-era" [published online ahead of print, 2020 Apr 23]. *Eur J Emerg Med*. 2020;10.1097/MEJ.0000000000000713. doi:10.1097/MEJ.0000000000000713 3) Lung, Heart, Vascular, and Diaphragm Ultrasound Examination of COVID-19 Patients: A Comprehensive Approach. *J Cardiothorac Vasc Anesth*. 2020 Jun 11:S1053-0770(20)30519-X. doi: 10.1053/j.jvca.2020.06.013. Best Regards
