

**Supplementary Table 1.** Relationship between treatment and discontinue using ACEIs/ ARBs

| Characteristic     | Total<br>n (%) | Discontinued ACEIs/ARBs<br>n (%) | Other anti-hypertensive drugs<br>n (%) | $\chi^2$ | p     |
|--------------------|----------------|----------------------------------|--|----------|-------|
| Glucocorticoid     | 11 (20.8)      | 7 (63.6)                         | 4 (36.4)                               | 0.895    | 0.344 |
| Hydroxychloroquine | 16 (30.2)      | 10 (62.5)                        | 6 (37.5)                               | 1.225    | 0.268 |
| Gamma globulin     | 6 (11.3)       | 2 (33.3)                         | 4 (66.7)                               | 0.233    | 0.62* |
| Antibiotic         | 30 (56.6)      | 16 (53.3)                        | 14 (46.7)                              | 0.158    | 0.691 |
