Aug 01, 2019 · These guidelines on the management of primary sclerosing cholangitis (PSC) were commissioned by the British Society of Gastroenterology liver section. The guideline writing committee included medical representatives from hepatology and gastroenterology groups as well as patient representatives from PSC Support. The guidelines aim to support general physicians, ...

Cholangiocarcinoma (CC) is a common and usually fatal complication of sclerosing cholangitis (PSC). There is no predictive test currently available to identify patients at high risk of cancer. Tumour markers (CA 19.9 and CEA) have been widely used and have sensitivity and specificity of more than 80% for the identification of cancer in PSC.
