Subject: eSirius3G -- New Protocol Approved: 2010-0736 Saito, Hiroshi
Date: Tuesday, October 11, 2016 11:55:52 AM

To: Hiroshi Saito

From: M. Paul Murphy, M.A., Ph.D., Chairperson
Institutional Animal Care and Use Committee (IACUC)
PHS Assurance #A3336-01

Subject: IACUC Approval for Protocol 2010-0736

Approval Period: 10/11/2016 - 10/11/2017

This e-mail verifies that your protocol/course outline entitled:

"Animal model of acute pancreatitis with aging"

has been approved by the IACUC. Your protocol was assigned the following IACUC Identification Number: 2010-0736. THIS NUMBER MUST BE RECORDED ON YOUR ANIMAL CAGES OR RACKS. Also, this number should be included in any future correspondence you might have with the IACUC.

It is your responsibility as principal investigator to implement the research/course as specified in your IACUC protocol. Also, it is your responsibility to inform the IACUC when your research/course is completed so that your file can be closed.

If your project has been or will be submitted to an external funding agency for support, it is your responsibility to transmit the IACUC approval notification to the agency. For assistance, contact the Office of Sponsored Projects Administration.

If significant changes in the procedures or types of animals to be included in your study or course are needed, prior approval from the IACUC is required. To obtain prior approval, an amendment to your protocol must be submitted through eSirius3G (<https://esirius3g.uky.edu>) to the IACUC.

Your IACUC protocol must be reviewed annually as specified in the federal regulations. You will be contacted by the Office of Research Integrity requesting submission of an on-line eSirius Annual Review Application. Failure to complete the application will result in termination of IACUC approval. If you have questions please call Angie Croucher in the Office of Research Integrity at 859/257-2549.
