[Complex genetic mechanisms in glaucoma: An overview](#)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3038510>

Based on gonioscopy, **primary** glaucomas are further classified as **primary open angle glaucoma** (POAG) and **primary** angle closure **glaucoma** (PACG). POAG may be associated with or without an elevated IOP and has an adult onset (usually >35 years) or **juvenile onset** (usually <35 years). Secondary glaucomas are characterized by the involvement of ...

[The Genetics of Primary Open-Angle Glaucoma: A Review*](#)

<https://www.researchgate.net/publication/23628941...>

Glaucoma is the major cause of irreversible blindness worldwide. **Primary open-angle glaucoma** (POAG), as the most prevalent form of **glaucoma**, is a complex inherited disorder and affects more than 2 ...

[\(PDF\) Complex genetic mechanisms in glaucoma: An overview](#)

<https://www.researchgate.net/publication/49675846...>

Glaucomas comprise a group of hereditary optic neuropathies characterized by progressive and irreversible visual field loss and damage to the optic nerve head.
