

Dear Reviewer:

Thanks for sharing your suggestions to deal with reviewers' comments. I am very exhilarated since this is the first time I have opportunity to respond to the reviewers. For the suggestions about "Some postulated etiology of the onset of SLE in this patient should be represented and discussed", "Some postulated etiology regarding serum ANCA positivity should be represented and discussed" and "Therapeutic option for older patients with autoimmunological diseases should be discussed", We have reviewed related literatures and discuss in the DISCUSSION section. We deeply appreciate your consideration of our manuscript.

Thank you and best regards.

Yours sincerely,

Dr. Shao-Dong Luan
