Cluster headache⁵ due to structural lesions: A systematic review of published cases

Long RJ *et al.*¹² Cluster headache due to structural lesions

Ru-Jin Long, You-Sheng Zhu, An-Ping Wang

Abstract

BACKGROUND

² Cluster headache (CH) is a severe incapacitating headache disorder. By definition, its diagnosis must exclude possible underlying structural conditions.

AIM

To ensure that there is not a potentially treatable structural lesion.

Cluster Headaches

Medical Condition

A series of extremely painful headaches that occur in cyclical patterns.

- 🏠

Common (More than 200,000 cases per year in US)
- 🧪

Requires lab test or imaging
- 🩺

Treatment from medical professional advised
- 🕒

Can last several years or be lifelong

The specific cause is unknown but abnormalities in the hypothalamus may cause this condition. Pallor, runny nose, extreme pain around one eye, eye swelling and tearing are the possible symptoms. Treatment includes pain relievers and surgery.

Symptoms

- Unilateral pain
- Pain in one eye
- Pain that radiates to the jaw
- Swelling in the affected eye
- Tearing
- Runny or a blocked nose
- Eye redness on the affected eye
- Facial sweating

The bouts of pain can occur 1 to 8 times in a day

Treatments

There is no cure for cluster headaches, Treatment decreases the pain, prevents an attack and shortens the duration of cluster headaches.

Medication

- Calcium channel blockers: Used to prevent cluster headaches.
[Verapamil](#)
- Alkali metal: Used to prevent chronic cluster headaches.
[Lithium](#)
- Corticosteroids: Acts by causing vasoconstriction.
[Prednisone](#)
- Triptans: Aims at relieving pain.
[Sumatriptan](#) · [Zolmitriptan](#)
- Somatostatin analogues: Medication aims at relieving pain.
[Octreotide](#)
- Benzodiazepines: Act by producing a numbing effect.
[Diazepam](#) · [Lorazepam](#) · [Midazolam](#)

Medical procedures: Occipital nerve stimulation

Causes

The cause is unknown; changes in hypothalamus may play a role. Factors that influence cluster headaches include:

- Allergens
- Stress
- Seasonal changes that occur in spring or autumn
- Male sex hormones
- Occasionally head trauma
