A rare case of giant gastrointestinal stromal tumor of the ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4485691>

1. Introduction. Gastrointestinal stromal tumors (GISTs) are the most frequent mesenchymal neoplasms of the gastrointestinal tract. They are rare, accounting for approximately 0.1–3% of all gastrointestinal tumors. Most GISTs occur in patients aged >50 years at the time of diagnosis. The etiological factors of GIST have not been determined so far, with the stomach being the most frequently ...
