## Scalp metastasis from gastric cancer: A case report and ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4301561>

**Gastric cancer metastatic** to the scalp is extremely rare with few cases reported to date (6–9). The current **report** presents a **case** of scalp **metastasis** from **gastric cancer** and a **review** of the related **literature** in order to provide new insights into the diagnosis, **treatment** and prognosis of such cases in

## Gastric and adrenal metastasis from breast cancer: Case ...

<https://pubmed.ncbi.nlm.nih.gov/32011488>

Gastrointestinal and adrenal gland **metastasis** from breast **cancer** are rare. **Simultaneous metastases** are extremely rare. Therefore, it is critically important to choose proper examination and **treatment** since the rapid diagnosis and primary **treatment** can significantly affect the survival of patients.

## Gastric cancer initially presenting as bone metastasis ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6176368>

The former **case** showed diffuse spinal vertebral bone **metastasis**, while the latter showed a single trapezium **metastasis**. The two cases were diagnosed as **metastatic gastric cancer** on further examination. The present study also describes the clinical courses and reviews the initial bone **metastases** in patients with **gastric cancer** from the **literature**.

Min-Feng Ye**Abstract**

## BACKGROUND

Gastric cancer (GC) with bone metastasis is rare, and rib metastasis is even less common. The clinical prognosis of GC with bone metastasis is poor given the lack of an effective treatment.

## [Transcriptomic and Genomic Testing to Guide Individualized ...](#)

<https://pubmed.ncbi.nlm.nih.gov/32210001>

Gastric cancer is globally the fifth leading cause of cancer death. We present a case report describing the unique genomic characteristics of an Epstein-Barr virus-negative gastric cancer with esophageal invasion and regional lymph node metastasis. Genomic tests were performed first with the stomach ...

## [Subcutaneous metastasis arising from gastric cancer: A ...](#)

<https://www.ncbi.nlm.nih.gov/pubmed/28413658>

Subcutaneous metastasis from gastric cancer is a rare manifestation, with a reported incidence of 0.8-1.0%. Cutaneous metastasis of cancer generally appears late in the course of the disease. Surgical resection of metastatic skin tumors is occasionally undertaken as palliative treatment to improve the patient's quality of life by controlling ...
