**Name of Journal:** *World Journal of Gastroenterology***Manuscript NO:** 59685**Manuscript Type:** ORIGINAL ARTICLE*Retrospective Study***Prognostic value of the preoperative fibrinogen-to-albumin ratio in pancreatic ductal adenocarcinoma patients undergoing R0 resection**

Li-Peng Zhang, Hu Ren, Yong-Xing Du, Cheng-Feng Wang

**Abstract****BACKGROUND**

Inflammation plays an important role in tumor progression, growing evidence has confirmed that the fibrinogen-to-albumin ratio (FAR) is an important prognostic factor for overall survival in malignant tumors.

## [The Prognostic Value of Preoperative Geriatric Nutritional ...](https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6970535)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6970535>

Introduction. **Pancreatic** cancer is one of the most common digestive system neoplasms with a poor **prognosis**. According to the relevant reports, **pancreatic ductal adenocarcinoma** (PDAC) is the most common histological type, with most **patients** dying within one year after diagnosis and a less than 6% five-year survival rate. 1, 2 To date, radical surgical **resection** is still the main treatment for ...

## [Prognostic Value of Preoperative Nutritional and ...](https://pubmed.ncbi.nlm.nih.gov/30225838)

<https://pubmed.ncbi.nlm.nih.gov/30225838>

Background: **Preoperative** nutritional and immunological patient factors have been found to be associated with **prognostic** outcomes of malignant tumors; however, the clinical significance of these factors in **pancreatic ductal adenocarcinoma** (PDAC) remains controversial. Objective: The aim of this study was to evaluate the **prognostic value** of nutritional and immunological factors in predicting ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7011356>

Feb 10, 2020 · Background. **Pancreatic** cancer has a high propensity for local invasion, hematogenous dissemination, and a high frequency of recurrence after curative **resection** resulting in the fourth leading cause of cancer-related deaths in the United States []. With the emergence of recent advanced multidisciplinary treatments for **pancreatic** cancer, the overall 5-year survival rate has been ...

## [Prognostic Biomarkers for Pancreatic Ductal Adenocarcinoma ...](#)

<https://www.frontiersin.org/articles/10.3389/fonc.2020.01466> ▾

Sep 17, 2020 · Background: **Pancreatic ductal adenocarcinoma** (PDAC) leads to the majority of cancer-related deaths due to its morbidity with similar mortality. Lack of effective **prognostic** biomarkers are the main reason for belated post-operative intervention of recurrence which causes high mortality. Numerous systematic reviews and meta-analyses have explored the **prognostic value** of biomarkers in PDAC so far.

## [Clinical Implication of Pre-operative C-reactive Protein ...](#)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6984104>

Jan 03, 2020 · Background: The C-reactive protein (CRP)-to-serum albumin ratio is associated with a poor **prognosis** in **patients** with several cancers. The purpose of this study was to clarify the relationship between the **preoperative** CRP/Alb ratio and overall survival of **pancreatic ductal adenocarcinoma** (PDAC) in **patients** who received radical surgery and S-1 adjuvant chemotherapy.
