## Ectopic liver attached to the gallbladder: An unusual ...

[https://www.hcplive.com/view/2007-04\\_07](https://www.hcplive.com/view/2007-04_07) ▾

Liver choristomas or **ectopic nodules** of **liver tissue** that are attached to the **gallbladder** by their own mesentery and are completely detached from **the liver** are uncommon. 6,12,13 Their typical location is in **the gallbladder wall** but, in some cases, they are found within the submucosa of **the gallbladder**. Anomalous **liver tissue in the wall of the gallbladder** has been described by various categories and ...

## A case of ectopic liver tissue adherent to the gallbladder

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6009597>

**Ectopic liver tissue** (ELT) is a rare developmental abnormality in which normally functioning **liver tissue** develops at an extra-hepatic site and has no connection to the true **liver**. This is in contrast to the accessory lobe of the **liver** which has an anatomical connection to the **liver** proper.
