## **SPECIFIC COMMENTS TO AUTHORS**

The manuscript shows a rare case of GCT involving a Meig's syndrome. In general, manuscript is well presented. However, I suggest consideration of additional references, they can be useful to enrich introduction and discussion sections. Please consider the following: -Meigs, J. V., & Cass, J. W. (1937). Fibroma of the ovary with ascites and hydrothorax: with a report of seven cases. *American Journal of Obstetrics and Gynecology*, 33(2), 249-267. - Ayala Eguigure, D. E. (2020). Síndrome de pseudo-Meigs por tumor de células de la granulosa. *Revista Peruana de Ginecología y Obstetricia*, 66(3). - Choi, K., Lee, H. J., Pae, J. C., Oh, S. J., Lim, S. Y., Cho, E. Y., & Lee, S. S. (2005). Ovarian granulosa cell tumor presenting as Meigs' syndrome with elevated CA125. *The Korean journal of internal medicine*, 20(1), 105. - Timmerman, D., Moerman, P., & Vergote, I. (1995). Meigs' syndrome with elevated serum CA 125 levels: two case reports and review of the literature. *Gynecologic oncology*, 59(3), 405-408. - Benjapibal, M., Sangkarat, S., Laiwejpithaya, S., Viriyapak, B., Chaopotong, P., & Jaishuen, A. (2009). Meigs' syndrome with elevated serum CA125: case report and review of the literature. *Case reports in oncology*, 2(1), 61-66. - Takeuchi, K., Sawada, M., Takeda, A., Yoshida, A., Sugimoto, M., Fujita, M., & Morita, H. (2020). Juvenile granulosa cell tumor with massive ascites: A case report and immunohistochemical study of ascites formation. *European Journal of Gynaecological Oncology*, 41(2), 281-283. The first reference should be edited as is the required format. Finally, consider to edit the title to enhance originality of your work and attractiveness to readers.

#### **SPECIFIC COMMENTS TO AUTHORS**

This manuscript described a case of Meig's syndrome caused by granulosa cell tumor with elevated CA125, which is rare and interesting. Meigs' syndrome caused by GCTs is less common, and no case describing intrathoracic lesions has been reported, which makes this case the first report which revealed nodules and a neoplasm with a fish meat-like appearance in the parietal pleura and nodules with a string of beads-like appearance in the diaphragm by thoracoscopic examination. In this case, the authors conducted the proper treatment which provide instructive guideline for readers. The conclusions were reliable and appropriately summarized. The language is generally OK, but still needs minor modification. After repeated and careful consideration, I finally make this decision.

## RE-REVIEW REPORT OF REVISED MANUSCRIPT
