## Subacromial bursitis related to HIV infection: case report

<https://pubmed.ncbi.nlm.nih.gov/21340312>

Objective: Describe a **subacromial bursitis** at the right **shoulder** of a 45-year-old male subject. The patient has been living with HIV/AIDS for 22 years. Methods: The ultrasonography and the MRI revealed the presence of a pronounced **subacromial** effusion, with an inflammatory reaction of adjacent tissues. The tumoration was handled firstly with a needle-puncture aspiration, with a thick liquid ...

## Subacromial Bursitis - StatPearls - NCBI Bookshelf

<https://www.ncbi.nlm.nih.gov/books/NBK541096/?report=reader>

A bursa is a fluid-filled sac found at several locations in the human body. It serves to lubricate joints and body surfaces exposed to higher degrees of wear and friction. The **subacromial** space in the **shoulder** is such a location. The **subacromial** bursa is bordered superiorly by the acromion, coracoid, coracoacromial (CA) ligament and the proximal deltoid muscle fibers and inferiorly by the ...
