

PEER-REVIEW REPORT

Name of journal: World Journal of Gastrointestinal Surgery

Manuscript NO: 59902

Title: Assistant skill in gastric endoscopic submucosal dissection using a clutch cutter

Reviewer's code: 00068674

Position: Editorial Board

Academic degree: MD

Professional title: Associate Professor, Doctor

Reviewer's Country/Territory: China

Author's Country/Territory: Japan

Manuscript submission date: 2020-10-17

Reviewer chosen by: Xi-Fang Chen (Part-Time Editor)

Reviewer accepted review: 2020-11-15 14:32

Reviewer performed review: 2020-11-15 15:04

1. This was an ex vivo experimental study, and the number of cases was significantly small, and the lesions were only limited in the middle or lower third of the Stomach. 2. The description of complications was not detailed, such as postoperative bleeding and emptying, which need to be further improved. 3. The language still needs some polishing.

This is a good study tThe study design was designed according to the standard endoscopic submucosal dissection design, and the research conclusion is true and reliable.o determine how assistant skill level affected the technical outcomes of gastric ESD-C using an ex vivo porcine training model. Question: 1. Why use a clutch cutter instead of other knives, such as IT knives, flush knives.Can other studies obtain similar conclusions? 2.Figure 3 What is the difference between supervisor and assistant? In fact, only one assistant is needed for endoscopic mucosal dissection.
