

**Dear Editor of World Journal of Gastroenterology,**

Please find the revised manuscript entitled “The Predictive Value of Biologic Blood Concentration on Endoscopic Inactivity in Inflammatory Bowel Disease” (Manuscript ID: 59908) here attached. The authors are grateful for the valuable and helpful comments of the reviewers. According to the comments, we have made improvements of the manuscript as follows and resolved issues listed.

### **1.List of Actions**

LOA1: We have increased one foundation grant named as No.2021ZA057.

LOA2: We have refined and modified language in the results of abstract mainly and other parts slightly.

LOA3: We have supplemented the “article highlights” section at the end of the main text.

LOA4: We have supplemented figure2 “Target of Blood Concentration during Different Therapeutic Stages of Biologics” and the figure2 document named as image file.

### **2.Responses to editor**

We have solved the issues listed by editors. (1) We have uploaded the approved grant application form(s) or funding agency copy of any approval document(s). (2) We have provided the original figure documents named as image file, table file. (3) We have prepared and arranged the figures using PowerPoint and word to ensure that all graphs or arrows or text portions can be reprocessed by the editor and uploaded the document in supplementary material. (3) We have written the “article highlights” section at the end of the main text.

### **3. Responses to reviewers**

Thank you for supporting the manuscript entitled “The Predictive Value of Biologic Blood Concentration on Endoscopic Inactivity in Inflammatory Bowel Disease” (Manuscript ID: 59908). Your encouragement would stimulate us to make more efforts to IBD research.

We have made every effort to improve the quality of the manuscript.

Thanks very much for your suggestions and looking forward to your responses.

Best regards,

Corresponding author Yi-Hong Fan & First author Wan-Ting Cao
