Metastatic Tumor of the Spermatic Cord in Adults: A Case ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4681788>

Metastatic spermatic cord (SC) **tumor** is extremely rare. Recently, we experienced a **case** of late-onset **metastatic** SC **tumor** from cecal **cancer**. This **case** is a 68-year-old **man** presenting with a painless right SC mass. He had undergone a right hemicolectomy for cecal **cancer** 6 years ago. Radical orchiectomy and adjuvant chemotherapy with S-1 were ...

Krukenberg tumor with concomitant ipsilateral hydronephrosis and spermatic cord metastasis in a man: A case report

Krukenberg tumor in a man

Abstract

BACKGROUND

Tumors of the spermatic cord are rare, and approximately 25% are malignant neoplasms. Metastatic spermatic cord tumors are even rarer. Several studies have revealed that the most frequent primary tumors metastasizing to the spermatic cord and peritesticular tissues have been neoplasms of the stomach and prostate. Furthermore, metastasis to the spermatic cord or epididymis may occur *via* the retrograde lymphatic and hematic routes. We present the case of a man with gastric
