[Colorectal cancer screening and surveillance: the present ...](#)

<https://www.ncbi.nlm.nih.gov/pubmed/12120116>

Colorectal cancer screening is now proven to be effective and is widely endorsed by guidelines committees. Several forms of **screening** have merit, but the **screening tests** used in individual patients are often dictated by insurers. The use of **screening colonoscopy** is expected to increase.

[Bowel Preparation for Colonoscopy in 2020: A Look at the ...](https://pubmed.ncbi.nlm.nih.gov/32377915)

<https://pubmed.ncbi.nlm.nih.gov/32377915>

Colonoscopy is considered the gold standard for **colorectal cancer screening** and can offer both diagnosis and therapy. The **bowel preparation** remains a significant barrier for patients who need to **undergo colonoscopy** and is often cited as the most dreaded aspect of the **colonoscopy** process.
