Jun 11, 2019 · **Granulomatosis with polyangiitis** (GPA, previously known as Wegener's **granulomatosis**) is a type of ANCA-associated vasculitis that affects small- to medium-sized vessels. GPA occurs with a prevalence of 24–152:1000000. The disease affects all races at every age. Various factors may have an impact on the etiology of GPA which is treated as an autoimmune disease.
