

PEER-REVIEW REPORT

Name of journal: World Journal of Psychiatry

Manuscript NO: 59956

Title: Selective ablation of type 3 adenylyl cyclase in somatostatin positive interneurons produces anxiety- and depression-like behaviors in mice

Reviewer's code: 02445281

Position: Editorial Board

Academic degree: MD, PhD

Professional title: Senior Scientist

Reviewer's Country/Territory: Mexico

Author's Country/Territory: China

Manuscript submission date: 2020-10-13

Reviewer chosen by: Chen-Chen Gao

Reviewer accepted review: 2020-12-01 02:07

Reviewer performed review: 2020-12-01 02:45

Review time: 1 Hour

SPECIFIC COMMENTS TO AUTHORS

Authors did a well-documented, well-designed, well-analyzed and well-discussed study. It deals with an interesting point of view about the participation of GABAergic neurons on the pathophysiology of experimental anxiety and depression. The theme by itself must be of interest for the Journal readers. However, the manuscript still contains several mistakes in orthography and syntaxes. Once fully revised and corrected, contains enough merits to be accepted for publication.
