

Re: 60002

Title: Obturator Nerve Impingement caused by the osteophyte at the sacroiliac joint: A case report

Dear Lian-Sheng Ma,

Thank you for your kind letter of “**World Journal of Clinical Cases Manuscript NO: 60002 - Notification on manuscript revision**” on November 25, 2020. We thank the reviewers for their comments and appreciate their valuable suggestions, and have now revised the manuscript according to the concerns raised in the reviews. A detailed copy of the authors “point-by-point response to the reviewer’s comments” is attached, and specific changes addressing reviewers' comments are marked (which paragraph, section and page are included).

Again, we would like to thank you for taking the time to review our manuscript and believe that our findings are of high significance. We would be most grateful for your kind consideration of this revised manuscript for potential publication in **World Journal of Clinical Cases**.

We look forward to hearing from you at your earliest convenience.

Yours sincerely,

Lei Xia, M.D

Answering Reviewers

Re: 60002

Title: Obturator Nerve Impingement caused by the osteophyte at the
sacroiliac join: A case report

Reviewer #1

C1:

Scientific Quality: Grade B (Very good)

Language Quality: Grade A (Priority publishing)

Conclusion: Minor revision

Specific Comments to Authors: 1. Authors stated in medical history, that the patient had a 2-week history of numbness and pain in his left lower limb when carrying heavy loads. Please specify the area of numbness in the leg (for ex. medial aspect of the thigh).

A1:

We appreciate the reviewer's positive evaluation of our work. and we deeply apologized for the lack in this report, We have added and marked the relative content in red as "The numbness and pain were mainly

located on the medial aspect of the thigh and extended to the left knee.”

(line 2, page 2; Medical history section)
